## RECENT WORK EXPERIENCE

## Machine Learning Engineer Maker Development

🗂 Part-time

Lima - Peru

- Implementation of Object Recognition Model for Retail Led the successful implementation of an object recognition model in a retail environment, enhancing inventory management efficiency, and providing valuable insights for decision-making.
- Implementation of Facial Recognition Model Directed the development and implementation of a facial recognition system, improving security and customizing the customer experience in specific environments.
- Implementation of Talking Face Model Developed and executed the implementation of a Talking Face model for interactive applications, enhancing communication and user experience in multimedia products.
- Implementation of Text-to-Audio Generation Model Headed the implementation of a text-to-audio generation model, providing innovative solutions for accessibility and customization of auditory content.
- NLP Implementation for Various Company Services Led the development and implementation of Natural Language Processing (NLP) solutions for various company services, enhancing automatic language understanding and user interaction.

## **Lead Software Architect**

#### Infosis

Argentina

- Creation and implementation of an invoice data extraction model using YOLO NAS and Keras OCR, developing a cross-platform application with Kotlin Multiplatform Mobile (KMM) and a GraphQL API in Python FastAPI.
- Implementation of Object Recognition Model for Retail Led the successful implementation of an object recognition model in a retail environment, enhancing inventory management efficiency, and providing valuable insights for decision-making.
- Implementation of Facial Recognition Model Directed the development and implementation of a facial recognition system, improving security and customizing the customer experience in specific environments.
- NLP Implementation for Various Company Services Led the development and implementation of Natural Language Processing (NLP) solutions for various company services, enhancing automatic language understanding and user interaction.
- Recommending changes to existing designs to improve efficiency or performance
- Designing new software applications or systems, as well as evaluating existing ones

## LIFE PHILOSOPHY

"If you want to build a ship, don't herd people together to collect wood and don't assign them tasks and work, but rather

teach them to long for the endless immensity of the sea. - Antoine de Saint-Exupéry"

## **MOST PROUD OF**

#### Courage I had

take projects from scratch and do everything possible to get them forward.

#### **Persistence & Loyalty**

I showed despite the hard moments and my willingness.

## **HONORS & AWARDS**

#### 1st Place

Mi Primer Paso Unversidad de Lima Nov 2019

#### 1st Place

Eventec Peruano Aleman Nov 2007

## **SOFT SKILLS**

**Technical Writing** 

People-Management

**Global Teams** 

Diversity & Inclusion

## **EDUCATION**

DevOps/Sre

**Udacity, Lima, Peru** 

描 Enero 2017 -- June 2017

Software Developer

**Open Source College, Lima, Peru** 

2011 -- 2012

- Conducting research into new technologies, techniques, and approaches to computing
- Creating technical documentation such as design specifications and development plans
- Developing new features or enhancements to existing products based on customer feedback and requests
- Technical leadership, management and guidance to development teams, where the deliverables' impact generated directly in revenue increase.
- Architecture design of full stack systems, reducing effort by selecting the most appropriate technologies for the implementation.
- Designed and proposed scalable service architectures
- Reduced the number of edge case customer issues by updating a retail system design to improve data consistency also increasing performance.
- Infrastructure setup and automation for DevOps implementation.
- Development of ETL using AWS Lambda and Glue services.
- Optimization of Lambda and Glue processes for cost reduction purposes.

## SRE / Senior DevOps Engineer

#### **Infosis**

 □ Full-time

描 Jul 2021 -- Nov 2022

Argentina

- I also replaced and improved the entire monitoring stack and wrote lots of alert rules and even custom Prometheus exporters to achieve what was needed.
- Test driven releases, Infrastructure as code and Automation.
- Preparation of documentation, within the code I produce by appropriate commenting, version descriptions via Git and Solution documentation for other engineers to follow.
- Analyzing, executing, and streamlining DevOps practices.
- Implementation of Infrastructure as code with Terragrunt and Terraform.
- Automating processes with the right tools.
- Facilitating development process and operations
- Setting up a continuous build environment to speed up software development and deployment process.
- There was a continuous work on improving the costs of infrastructure. This involved resizing machines, auto scaling groups, spot instances, backup policies and several other things.
- Implement And Administration of Kubernetes.
- Administration and troubleshooting of CI, CD on Gitlab.

#### CoFounder & CEO

#### **HadenLabs**

🕇 Part-time

🗂 Jan 2014 -- Now

Lima - Peru

- Act as a trusted technical advisor to customers and solve complex Cloud Infrastructure and DevOps challenges.
- Create and deliver best practices recommendations, tutorials, blog articles, sample code, and technical presentations.
- · Wrote Alexa Skill.
- Wrote Terraform modules for resources github, aws and discord.
- Infrastructure Provisioning (Crossplane, Terraform, Terragrunt, Ansible)
- Wrote System of IoT working with aws and terraform.
